

WE ARE *live* IN
Veli Lošinj

27th CROATIAN MEETING OF CHEMISTS AND CHEMICAL ENGINEERS

WITH INTERNATIONAL PARTICIPATION • 5th SYMPOSIUM "VLADIMIR PRELOG"
5-8 OCTOBER 2021 • VELI LOŠINJ, HOTEL PUNTA, CROATIA

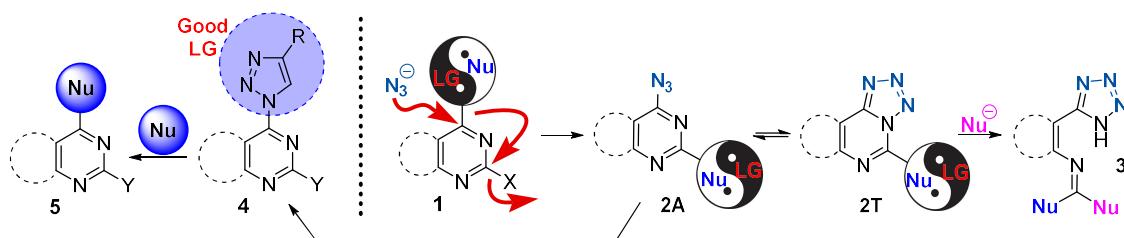

BOOK OF ABSTRACTS

SUBSTITUTION AND RING OPENING OF FUSED PYRIMIDINES USING THEIR ACTIVATION BY AZIDO AND TRIAZOLYL GROUPS

Māris Turks, Irina Novosjolova, Ērika Bizdēna

Institute of Technology of Organic Chemistry, Faculty of Materials Science and Applied Chemistry, Riga Technical University, P.Valdena Str. 3, Riga, LV-1048, Latvia, maris.turks@rtu.lv

We have developed synthesis of 2,6-bis-triazolyl-purine derivatives **4** ($Y = 1,2,3S_{N}Ar$ reactions by substituting C(6) position of purine with a broad range of *N*-, *S*-, *Se*-, *C*-, *O*-, and *P*-nucleophiles (Scheme 1).^[1] 2,6-Bis-triazolyl-purine derivatives **4** and their $S_{N}Ar$ products **5** are fluorescent and this has led to development of ion sensing, cell imaging systems and applications in materials science.^[2] On the other hand, azido-substituted fused pyrimidines of type **2** exhibit azide-tetrazole tautomerism, which was instrumental to develop novel substitution methodologies (nucleophile-nucleofuge dance) around the cycle^[3] and also pyrimidine ring opening reactions leading to compounds of type **3**.^[4]

Scheme 1.
