PREFACE

The materials in this issue of the journal „Power and Electrical Engineering” are mainly papers prepared for the 48th international scientific conference of Riga Technical University on "Power Engineering" and "Electrical Engineering".

The conference will take place on 11th - 13th October, 2007.

Editorial Board

CONTENT

| | |
|--|-----|
| <i>Preface</i> | 3 |
| <i>Podgornovs A., Zviedris A.</i> The technique for processing the results of mathematical simulation of the magnetic field, and the algorithm for determination of special mode performances of synchronous machines | 10 |
| <i>Barkāns J., Junghāns G.</i> Profit-based optimal scheduling of power plant production | 17 |
| <i>Barkans J., Zalostiba D.</i> Protection of generating units at deviations of parameters by sectioning a power system as a tool for blackout prevention | 25 |
| <i>Survilo J.</i> Consideration of specific resistance of a conductor by the method of apparent impedance | 36 |
| <i>Survilo J.</i> On calculation of the time of maximum losses by load graph | 43 |
| <i>Rankis.I., Vitols A., Zhiravetska A.</i> Evaluation of utilization efficiency of regenerative energy in the Riga tramcar system | 51 |
| <i>Vitolina S., Dirba J.</i> Improvement of DGA interpretation method for power transformers in Latvia | 59 |
| <i>Guseva S., Breners N., Vindbergs H.</i> Economic estimation of updating the bushings of high-voltage transformers | 66 |
| <i>Roasto I., Vinnikov D., Klytta M.</i> Control and protection of a high-voltage IGBT-based half-bridge inverter | 75 |
| <i>Jalakas T., Vinnikov D., Laugis J.</i> Output rectifier for the high-voltage high-frequency isolated DC/DC converter | 84 |
| <i>Dashkova-Golovkina J., Dirba J., Levin N., Pugachov V.</i> Tooth zone analysis of multipole synchronous generators with permanent magnets | 96 |
| <i>Kilter J., Meldorf M.</i> Modeling and estimation of distribution network operation | 103 |
| <i>Kočanovs N.</i> Calculation of contact and power network safety parameters for KNX/EIB (European Installation Bus) automatisisation system | 109 |
| <i>Ketner E., Ketner K., Berziņa K., Latve I.</i> Research into the synchronization stability for two generators using mathematical simulation | 115 |

| | | |
|--|--|-----|
| <i>Uteshevs I., Levchenkov A.</i> | | |
| Intelligent network for safety of electrical railway transport | | 122 |
| <i>Krumins O.</i> | | |
| Active traffic guidance data system | | 128 |
| <i>Ketnere E., Ketners K., Klujevska S., Konuhova M.</i> | | |
| The research into the self-starting mode of the induction motor | | 136 |
| <i>Beinarts I., Levchenkov A.</i> | | |
| Intelligent systems for optimisation of climate parameters using multi-criterial decision making in transport vehicles | | 143 |
| <i>Kuņicina N., Galkina A.</i> | | |
| Development of a procedure for increasing the electroenergy consumption efficiency in the public transport system | | 150 |
| <i>Brazis V., Greivulis J.</i> | | |
| The capacitor braking mode of asynchronous drive with frontal part winding | | 158 |
| <i>Dirba J., Kamolins E., Levin N., Pugachev V., Serebryakov A.</i> | | |
| One-phase reactive generator with annular windings | | 164 |
| <i>Bisenieks L., Galkin I., Stepanov A.</i> | | |
| The use of supercapacitors for widening the scope of application of photovoltaic cells | | 171 |
| <i>Gorobetz M.</i> | | |
| Electronic intelligent agents for control of mechatronics system | | 178 |
| <i>Kavehnia F., Seifi H., Keivani H.</i> | | |
| The use of characteristics of the over-current relays for optimising the selectivity and speed of a power system | | 190 |
| <i>Belugina V., Lomane T.</i> | | |
| The improvement of distance protection effectiveness for the tapped lines | | 198 |
| <i>Gamm A.Z., Kolosok I.N., Paltsev A.S.</i> | | |
| Methods for decomposition of EPS state estimation problem when solving it on the basis of multiagent technologies | | 205 |
| <i>Kavehnia F., Keivani H., Askari M.</i> | | |
| Describing the operating principle of a three-phase multi-level inverter based on multi-carrier PWM | | 215 |
| <i>Zaķis J., Raņķis I., Žiravecka A.</i> | | |
| Comparison of flexible systems for compensation of reactive power | | 225 |
| <i>Galkina A., Ribickis L., Kunicina N. Caiko Y.</i> | | |
| Decision making support for the choice of a controlled pump drive in the project of water supply system renovation | | 234 |
